## **GutterStuff Home**

**The most effective gutter protection product.**

**GutterStuff®Pro** is the original Patented Foam Filter Insert, which prevents leaves and large debris from entering and clogging your gutters, while allowing all the rainwater to flow through the gutter system, rapidly.

### **Q. Do you need to clean it?**

While [GutterStuff®](#) is not completely maintenance-free, not much effort is required. The porous nature of the material allows the smallest particles to pass through while the larger particles remain on top to be blown away or rinsed off by rain. However, over time some debris may accumulate. Periodic sweeping of the top of [GutterStuff®](#) with a stiff-bristled broom or brush should be all that is needed to enjoy years of trouble-free service.

### **Q. Does the heat from the sunlight harm the foam?**

No, only the very top surface gets a little stiff. The rest of the filter is shaded so the Sun's ultra-violet rays cannot harm it.

### **Q. Can the wind blow it out of the gutter?**

No it fits snugly in the gutter and under the spikes.

### **Q. How long has this product been on the market?**

[GutterStuff®](#) was first marketed during the first quarter of 2003.

### **Q. So, is [GutterStuff®](#) really as great as it sounds?**

We don't want to mislead you into thinking that [GutterStuff®](#) is a "miracle" solution. Despite years of effort, there is no perfect gutter screening system. Don't listen to anyone who says otherwise. During many years of service, your gutters get a heck of a lot of abuse. With constant exposure to tree debris, bird droppings and asphalt "pellets," it's difficult for any product to be absolutely 100% effective. That being said, we believe [GutterStuff®](#) provides the best compromise of an open gutter system with *minimal maintenance* schedule, at *extremely affordable pricing*.

While we believe it is more effective and user-friendly than other products out there, [GutterStuff®](#) will require occasional maintenance such as periodic sweeping of accumulated surface debris. However, compared with the alternatives, you'll find [GutterStuff®](#) to be the easiest, most cost-effective gutter protection solution available.
